

WORKSHOP #1: FUNDAMENTALS OF VERTICAL AGRICULTURE PRACTICES AND TECHNIQUES

Tuesday Jan 16, 2024, 1-3pm PDT, online

VERTICAL AGRICULTURE WORKSHOP SERIES

Vertical Agriculture is an increasingly important farming technique where growing food happens in vertically stacked layers in an indoor environment. Join us for the first of three free educational workshops for vertical agriculture and urban agriculture training. In this workshop you will learn key concepts in vertical agriculture practices and techniques. Through workshop activities we will also gather your feedback on the topics and materials in order to improve and expand this workshop series. Participants will be entered into a draw to receive one of four \$25 gift cards as a token of thanks!
